

Our Holiday Tradition of Giving Continues!

In 2013, we began contributing to healthcare providers where the children of our employees were being helped. It is because of our employees' consistent hard work that we are able to donate to kids with muscular dystrophy, ALS and other related diseases. These diseases cause children to lose their freedom to walk, talk, run and play; and even worse to laugh, hug and eat. As we mark our 11th year of this tradition, we are proud to donate to two organizations totaling \$100,000 again this year!

Riley's Hospital for Children at Indiana University Health is one of the nation's leading pediatric hospitals and Indiana's first and only comprehensive hospital dedicated exclusively to the care of children. Our donation will provide the setup of a harness step system in their physical therapy gyms. Riley's Physical Therapists that work with kids with neuromuscular diseases are very eager to introduce this system to help these children improve muscle strength and function, protect them from falls and injury and increase their confidence. Riley Hospital operates four physical therapy gyms, making access more convenient for patients and their families.

Muscular Dystrophy Association (MDA) helps people all over the US living with muscular dystrophy, ALS, and other related neuromuscular diseases, empowering them to live longer and more independent lives. Each year, the MDA has overnight youth summer camps allowing kids to live beyond their limits at no cost to their families. This camp is a place of complete inclusion, empowerment, exploration, and growth. Marten's donation will allow the MDA to include more children and create a world of possibilities for them this summer!
